PROBLEM

Obesity in Qatar is a critical health issue.

45%
of students in Qatar
affected

21%
the global average

Despite existing policies, obesity rates continue to rise.

Insufficient physical activity is a key contributor:

37%
Adults

88%
Children

This issue requires urgent attention due to its health implications and projected economic costs.

RELATED POLICIES

“Overweightness and obesity are becoming an issue of high national concern for the Qatari health services and policymakers”

Dr. Kholoud Al Mutawa
Head of Non-Communicable Diseases in the
Ministry of Public Health, in the state of Qatar

Qatar National Nutrition and Physical Activity Action Plan adopted in 2017 with a strategic outcome to reduce premature mortality from NCDs through healthy diet and physical activity through achieving the following targets:

10% relative
reduction in
prevalence of
insufficient physical

A 30% relative
reduction in mean
population intake of
salt/sodium

Halt the rise in diabetes and obesity

SDGs

KEY INTERNATIONAL POLICY:

SDG Target **3.4** Reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being. SDG recognizes physical inactivity as one of the key modifiable behaviours in order to achieve this reduction.

PHASE 0

INPUTS

Personnel to negotiate with collaborators and stakeholders.
Meeting venues and catering for negotiations.

Developers for coding the app.
Nike instructors for developing fitness programs and exercises.
Video experts to record exercises.
App Store submission and data center costs.

Marketing experts to promote the app to students.
Developers for fixing bugs, rolling out new features.
Servers for maintaining the app.
Fitness instructors and video experts for new exercises and challenges.

DELIVERABLES

Confirmed contributions from collaborators to begin application development

Bug-free application that can be rolled out to the initial users in Phase 1

Engaged userbase, data for stakeholder monitoring, and continued application improvement based on user feedback

APP DESIGN

Social media
function, share
posts and
achievements

Track your
progress and
health data

Compete with
friends, and invite
them to QF sport
facilities

Custom fitness
plans

Nike expert
instructors

Custom workouts
based on QF gym
equipment

PHASE 1

**GEORGETOWN
UNIVERSITY**

Rollout to Georgetown University only including GU-Q gym and selected sports facilities within QF: football, basketball, tennis, swimming.

PHASE 2

**مؤسسة قطر
Qatar Foundation**

Rollout to all of Qatar Foundation, including all of the universities and QF gyms and facilities.

OUTCOMES

64% app installed rate, with at least 25% active weekly users within the first 6 months.

3-5% of body weight loss for all the overweight students using the app within the first 6 months.

50% increase in the use of QF sports facilities within the first 6 months.

1/3 of all the challenges/invites sent getting accepted.

Healthier, more active, less obese student population in Qatar in the long run.
