## PROBLEM

### HMW Framing

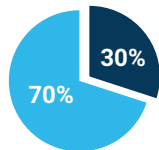

How might we remove the stigma around tap water drinking so that residents in Qatar have more peace of mind drinking it?

Many people in Qatar avoid drinking tap water due to the stigma around its safety. Concerns over the cleanliness of water tanks further discourage its use, as residents fear impurities that might compromise water quality.

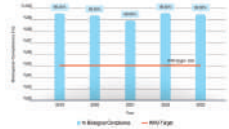

### DATA AND STATISTICS

Tap water as safe as bottled water: QF study - (The Peninsula Newspaper, 2015)

■ Non-Tap Water Drinkers  
■ Tap Water Drinkers

Qatar's Tap Water Quality Consistently Exceeds WHO Standards (2019-2023)

## INPUTS

- Funding** (Money for resources, campaigns, and technology)
- Web Developers** (Coders to build and maintain the website)
- Application process** to become a **Certified Tank Cleaning Company**
- Application process** to become a **Certified Filter Company**
- Designers** (For brochures, adverts, and website visuals)
- Customer Support Staff** (For hotline and kiosks)
- Water Testing Team** (To conduct regular water quality tests)
- Material to print** and manufacture design items
- Software to design** awareness material
- Researcher** to access reports highlighting waters safe

## OUTPUTS

- A continuously maintained website with certified tank cleaning and filter companies
- A hotline to call to get water tested
- Kiosks in Malls
- Water Testing Kits
- Brochures and QR Codes to raise awareness

### Study: Contrary to public opinion, Qatar tap water 'very safe'

Peter Harvey - February 12, 2015 - 2 minute read

To examine and measure various physical, chemical and biological parameters that contribute to improving water quality, it is also equipped with five modern instruments to measure and control turbidity, hardness and acidity levels of water. The drinking water in Qatar has long been treated for its quality by experts and common people alike. Decades have been recommending Qatar's tap water over that bottled water. At the same time, consumers were being cautioned about maintenance and hygiene of the water storage facilities such as overhead tanks. Most often the source of contamination and dirt in the tap water is the water tank. So, regular maintenance of the tanks are essential. Last year, drinking water quality of Kahramaa exceeded the index of International Standards for Drinking Water of World Health Organization. And in the same year, it achieved an entry in the Guinness Book of World Records for Largest Drinking Water Storage Tank. The company launched the strategic Water Security Mega-

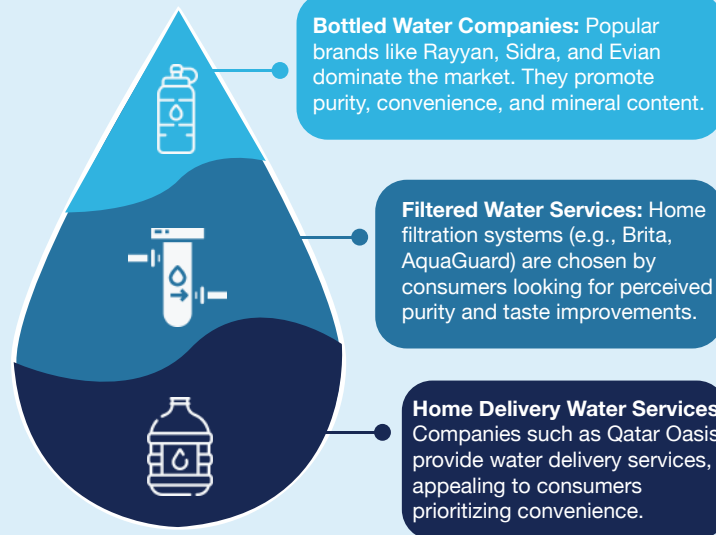

## ACTIVITIES

- Develop and launch the website (Kahramaa)
- Set up certification process (All)
- Design and produce awareness materials (Kahramaa, MoPH)
- Hire a water testing team and train them (Kahramaa)
- Recruit and train customer support staff (Kahramaa)
- Setup call number (Kahramaa)
- Purchase water testing kits (Kahramaa)
- Tank cleaning incentives and contractors (Ministry of Municipality)
- Establish mall kiosks for public engagement (All)
- Coordinate with certified companies
- Compile and release regular water quality reports (Kahramaa, MoPH)
