

PROBLEM

How can we **reduce students' sitting time** in schools to improve their physical, mental and cognitive health?

48.8% 6 to 12 years old
64.4% 12-17 years old
85% 13-15 years old girls
75% 13-15 years boys

DO NOT meet
physical activity
recommendations

1.9 million global deaths per year could be prevented with sufficient levels of PA

1-2 PE classes weekly

Structured sitting based classes

No movement breaks

STAKEHOLDERS

وزارة الصحة العامة
Ministry of Public Health
دولة قطر • State of Qatar

Role: Train teachers and educate school students on the benefit on movements breaks and PA in general.

وزارة التربية والتعليم والتعليم العالي
Ministry of Education and Higher Education
دولة قطر • State of Qatar

Role: Oversee the application of the intervention in schools in Qatar and incentivize good implementation.

COLLABORATORS

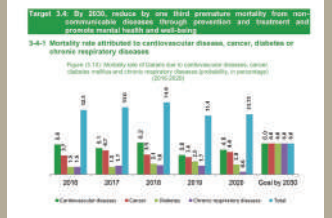

Teachers
Role: prepare and deliver learning related movement breaks during class time every 30-40 min

BENEFICIARIES

School aged students

SDG'S

INPUTS

Project Coordinators

- Pitch the project with Health Promotion Department (MOPH) And Department of Curriculum and Learning Resources (Department of Schools and Student Affairs) MOEHE. (2 meetings)
- Hire 2 staff to overlook the program.

MOPH

- 3 training materials for the workshops (teacher, parents, and Students) about the health impact of prolonged sedentary behavior.
- 2-4 members to Monitor and evaluate the health outcomes.
- 4-6 healthcare professionals to deliver the workshops

MOEHE

- Dept of SA will provide funds for the teacher workshops and clocks for 12 classroom.
- Curriculum integration: Provide resources (balls, legos etc) ,for integrating movement breaks into subjects.
- Organize 2 parent & student workshops in collaboration with project coordinators.
- 2-4 members Monitor and evaluate the educational outcomes of the intervention.

Teachers

- 72 teachers to prepare & Deliver the inclusive activities to 12 classrooms
- Ensure students' engagement in activities and movement.

Students & Parents

- Parents to sign consent forms
- Students participate and abide by the program rules.

ACTIVITIES

Teacher Training

- By: Experts from MOPH with health educators and physical activity specialists.
- Initial Training: One full-day workshop at the program start.
- Follow-Up: Monthly meetings to share best practices and refine techniques.

Classroom Movement Breaks & Curriculum Integration

- Frequency: 5-10 minutes every 45 minutes during class time.
- Incorporate movement into 50% of weekly classes.
- Activities: Simple stretches and light aerobics or Subject-related interactive tasks (e.g., Math Active Problem Solving).

Sedentary Time Clock

- To monitor sitting time and prompt movement.
- Classroom devices issue alerts every 45 minutes to signal movement breaks.

Student Selection

- Two primary schools in Al Rayyan- Grades 1-6
- Random cluster sampling selects one class per grade per school, ensuring balanced age and gender representation.

Parent Selection and Engagement

- Selection Process: Parents are chosen based on children's participation in randomly selected classes.
- Engagement Plan:
 - Information Sessions: Initial meetings to explain goals and invite parent volunteers.
 - Workshops: One workshop per term to educate parents on classroom integration.
 - Feedback Mechanisms: Parents provide input via surveys (online or printed) or focus group discussions held twice a year, facilitated by MOPH.

Monitoring and Feedback

- Quarterly stakeholder meetings (teachers, MOPH, MOEHE) to review progress.
- Teacher Feedback: Monthly reports detailing movement break implementation, activity types, and student engagement.
- Student and Parents Feedback: quarterly feedback forms filled out to evaluate student experiences and impact of physical and mental well-being.

OUTPUTS

90% of teachers are trained within the first 1-2 months.

5 all students participated in 5 structured movement breaks daily

12 sedentary clocks in classrooms

90% 90% full feedback forms submitted and analysed

1 pilot study published by MOEPE

BUDGET

Category	Details	Estimated Cost (QAR)
Teacher Training	Initial workshop and two follow-up sessions	60,000
Technology	Simple clocks for movement breaks	6,000
Monitoring and Evaluation	Surveys and basic data analysis	30,000
Project Coordination	Basic logistics and part-time support	20,000
Total Estimated Cost		116,000

OUTCOMES

Short-Term Outcomes (0-12 months)

Increased Physical Activity:
20% rise in daily activity levels, monitored via logs.

Improved Focus:
7-10% boost in attention, measured through teacher surveys and assessments.

Reduced Sedentary Time:
30-60 minutes less sitting daily, tracked via schedules.

Teacher Engagement:
All participating teachers are trained, and quality is monitored through observations.

Mental Well-being:
10% drop in stress and anxiety, assessed via student surveys and counselor feedback.

Long-Term Outcomes (3-5 years)

Reduced Obesity:
5-10% decrease in obesity rates, tracked via annual BMI and health screenings.

Behavioral Change:
70% of schools adopt movement-based programs, measured through surveys and interviews.

Less Sedentary Time:
25-30% reduction in daily sedentary time, fostering active lifestyles.

Improved Mental Health:
15% decrease in anxiety and stress, assessed via self-assessments and counselor reports.

Higher Academic Performance:
15-20% improvement in test scores and learning outcomes, monitored over multiple years.
