

HOW MIGHT WE?

How might we create a secure and accessible **digital platform for adults to seek mental health support** without fear of stigma or privacy breaches?

How can we ensure professional care delivery while fostering a more accepting society?"

EVIDENCE

75% Privacy Concerns
Medical record access, social judgment, family reputation.

75% Stigma Impact
Cultural barriers, religious misconceptions, isolation, career fears.

60% Access Barriers
Prefer private care, limited professionals, cost, language issues.

30% COVID-19 Impact
rise in telehealth, increased mental health concerns.

PROPOSED SOLUTION

Mobile App Features

- Secure, private consultations.
- 24/7 accessibility, multilingual support, and diverse tools.
- Anonymous, encrypted communication.
- Educational materials to combat stigma.

Offline Access

- Downloadable self-help content (mindfulness, coping strategies).

AI-Driven Features

- Chatbots for immediate emotional support before professional connection.

STAKEHOLDERS & COLLABORATORS

INPUTS

Resources: Mental health professionals (2-3)
Funding: App integration (less than 6 month)
Personnel: Therapists - IT.
Technology: Secure servers; APIs for EHR integration.
Time: 12-18 months for development and rollout.
Partnerships: Collaborate with the Ministry of Public Health.

Resources: Security protocols.
Funding: Public safety initiatives.
Personnel: Cybersecurity experts.
Technology: Data protection tools.
Time: Regular security audits.
Partnerships: Work with law enforcement on legal concerns.

Resources: Community outreach programs (3-5schools, workplaces)
Funding: Social welfare budgets.
Personnel: Social workers for community engagement.
Technology: Communication platforms for outreach.
Time: Ongoing public awareness campaigns.
Partnerships: Collaborate with 2-3 NGOs to reach underserved communities.

ACTIVITIES

Development
Meet with (HMC, Mol, MSDF)
Create a secure app
Develop **10+** educational resources

Training
• NGOs training **150+** professionals
• leaders/influencers.

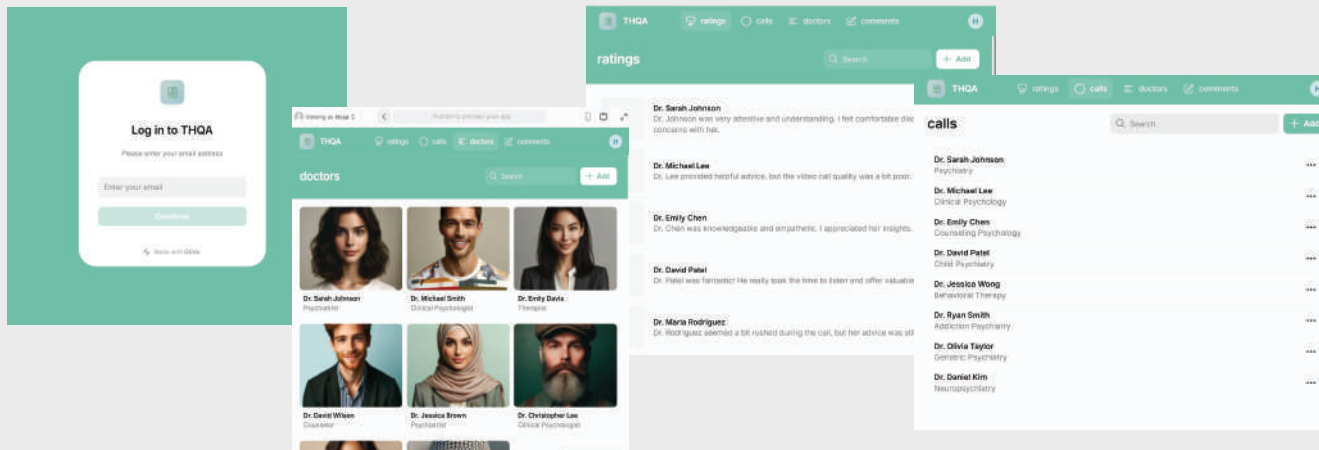

Awareness Campaigns
• Social media
• Partner with influencers
• Visit at 5 -8 schools, workplaces

Monitoring and Updating
• Surveys /app feedback
• Update the app

APP APPEARANCE

OUTPUTS

Development
• All features completed.
• **10+** educational resources added

Training
• **150+** trained (professionals).

Awareness Campaigns
• **1 million** people reached social media.
• **10,000+** downloads first three months.
• Visits to **10+** schools and workplaces.

Community Engagement
• **10+** workshops and 5 webinars conducted.
• **500+** people attended events.
• **90%** of participants' feedback on awareness.

Monitoring and Updating
• Quarterly reports on feedback
• Regular updates

Sustainability
• Partnered with **3+** private companies/funding.
• Reduce dependence on government funds by **50%** after 2 years.

OUTCOMES

Short-Term Outcomes (First 2 Years)

Usage of Mental Health Support
• **10,000+** app downloads/3 months.
• **50,000** active users/end of the first year.

Increased Awareness
• **1 million** people/campaigns.
• **500+** people attendance workshops/webinars

Reduced Stigma
• **60%** of app users feel comfortable
• Open discussions/mental health in communities.

Improved Access for All
• **3+** languages

Long-Term Outcomes (3-5 Years)

Mental Health Becomes Normalized
• Less stigma seeking help

Better Mental Health Across Communities
• Support through app.
• **70%** of users feel better

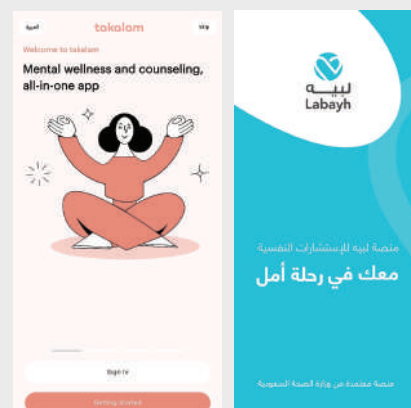

Stronger Health System
• App/part of Qatar's national health strategy.
• **150+** trained professionals use the app.

Sustainable Growth
• Private companies/fund help the app long-term.
• Updates for app useful/trusted.

MARKET COMPETITORS

Feature	THQA APP	Traditional Therapy	Private Online Platforms	Crisis Helplines
Cost	Free	High	Medium-High	Free
