HOW MIGHT WE

Motivate adolescents aged **15–17** in Qatar to increase their physical activity through a gamified augmented reality mobile application?

PROBLEM

Consequences of physical inactivity:

- Obesity
- Type-2-diabetes
- Heart disease
- High blood pressure
- Premature death: **3.2-5 million** deaths per year globally.

EVIDENCE

WHO recommendation: 60 min/day of Physical Activity

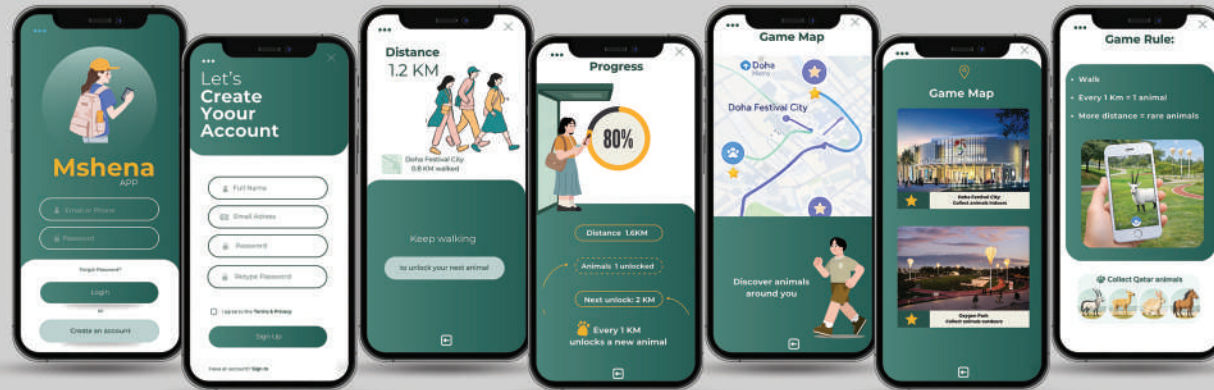

- 81%** Inactive Globally
- 86%** Inactive in Qatar
- Physical Inactivity is the **4th** leading cause of premature death worldwide
- 69%** of deaths in middle-income countries linked to inactivity.

IMPLEMENTATION PLAN

Phase I: Research (3 months)

- Review teen inactivity/obesity data
- Define target (ages 15–17)
- Assess existing tools

Phase II: Stakeholder Engagement (2 months)

- Gather feedback & refine idea
- Set budget & partners
- Secure approval

Phase III: Development (5 months)

- Build app
- Create rewards & challenges
- Pilot test

Phase IV: Pilot Launch (2 months)

- Recruit users & launch
- Track activity and participation

Phase V: Evaluation (12 months)

- Compare PA outcomes
- Survey users & engagement
- Identify improvements

Phase VI: Scale-Up

- Present to policymakers
- Refine & expand users

INPUTS

Ministry of Public Health (MoPH)
Health Promotion and NCD:
Policy Guidance/Alignment
Health information Center: National Data

Primary Health Care Corporation (PHCC)
2 data analysts: tracking, analysis, and survey
Quality and Patient Safety Committee – M&E oversight

ZARTEK
Technical Development
App development company
App design (UI/UX), coding, testing, maintenance

Human Resources
2 Social media specialists (TikTok, Instagram campaigns)
4 trained student volunteers (recruitment & kiosk support)
1 Project coordinator

Infrastructure
Kiosk/pop-up approvals (DFC & QA)
Two tables and **4** chairs
Tablets/devices for sign-up
Two rollups from Zartek

OUTPUTS

200 adolescents
(15–17 years) enrolled

- 100** from Doha Festival City
- 100** from Qatar Academy

≥ **80%** download and account activation rate

≥ **60%** active users after 1 month
Top user identified and rewarded weekly

≥ **70%** monthly survey response rate

At least **2** partnerships secured for incentives

OUTCOMES

Short-term (3–12 months)

- 65%** weekly app use
- 2,000–3,000** steps/day
- 70%** reported higher motivation rate

Medium-term (1–2 years)

- 20–30%** activity increase
- Improve awareness of healthy lifestyle

Long-term (2–3+ years)

- 35%** increase in physical activity levels in target group
- Measurable reduction in overweight/obesity risk trends

Scale-up:

- Expansion to adults
- Integration with national health programs

COLLABORATORS

BENEFICIARIES

- Qatar Academy Doha
100 volunteers
- Doha Festival City Mall
100 volunteers

ACTIVITIES ROADMAP: FROM DEVELOPMENT TO IMPACT

Phase I

Technical & Policy Foundation
Achieving readiness across launch phases including bug testing and onboarding preparation

Infrastructure & Site Setup
Ensuring 100% readiness through 2 kiosks on both sites

Phase II

Gamified Nudging Cycle
Participants claiming rare Qatari animals for every 3KM walked, getting weekly monetary / virtual rewards according to leaderboard results

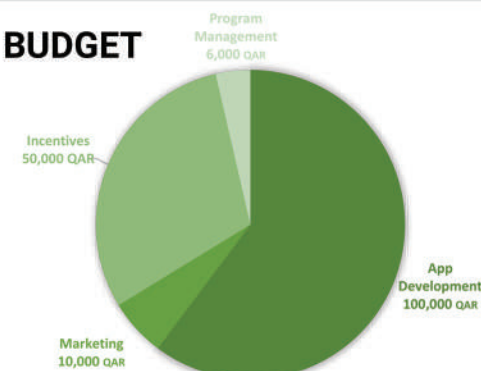

Users Recruitment
Acquiring voluntary registration through user kiosk visits

Continuous Data Monitoring
Analysts track activity and generate monthly improvement reports

BUDGET

PARTNERSHIPS (INCENTIVES& ENGAGEMENT)
