

Problem

Patients in Qatar's public hospitals experience long waiting times for outpatient appointments.

Evidence of Problem

Patients at Al Wakra Hospital's pediatric clinic wait **57 days** on average, reflecting a global trend reported by the OECD.

Solution Maw'id App

Maw'id enables patients to self-book the earliest available appointment through real-time visibility of slots across multiple healthcare facilities improving access, transparency, and efficiency.

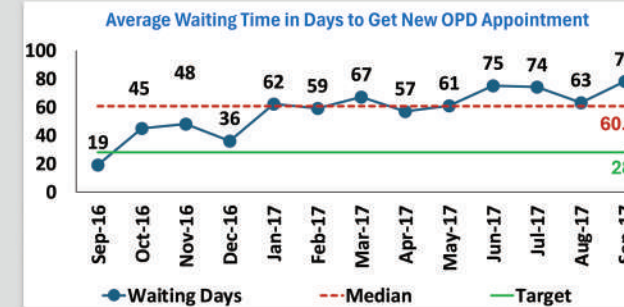

Evidence of Solution

Evidence shows digital booking can improve -

Waiting Times **~↓64%** No Shows **~↓63%** Patient Satisfaction **~↑42%**

How Might We

How might we reduce long waiting times for people seeking outpatient care in public hospitals in Qatar, so that patients receive timely, appropriate care that improves outcomes and experience?

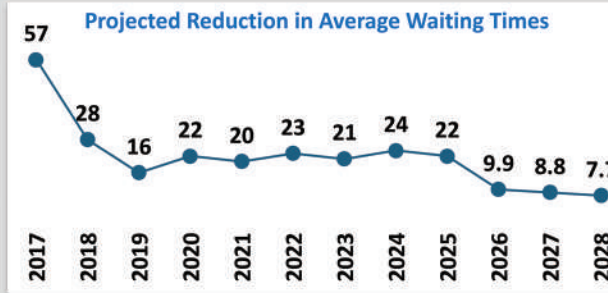

Aim: Reduce pediatric referral-to-appointment waiting time in Al Wakrah by **≥30%** within 6 months through a digital cross-facility appointment booking platform.

Input

- Data and information on patient registration & referrals (8 facilities)
- Public private partnership for appointment slot sharing (8 facilities)
- IT hardware and software for appointment booking
- Staff - clinicians (16), IT team (8), referrals management (16) & project management team (5)

Output

- Maw'id app (1) for appointment self booking by patients
- Performance evaluation dashboard (1) on Maw'id efficiency & effectiveness
- 50% of trained staff both clinical & non-clinical in public & private facilities
- Guidelines/policy (1) on appointment referral & management

State	Current	Future
 Access	Fragmented system	Unified access
 Visibility	No real-time slots	Real-time slots
 Booking	Multiple calls	Self-booking app
 Scope	Single hospital	Facility of choice
 Referral	Hospital-based	System-wide
 Time	Delayed care	Faster access

Strategic Alignment

Qatar NHS 2024 - 2030
Priorities like universal access, preventive care, digital health

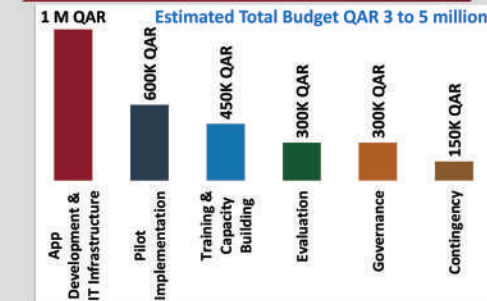

UN SDG
3 Good Health & Well-being
3.8 Universal Health Coverage

OECD
Waiting Times for Health Services

Budget

Collaborators

- MOPH**
Policy, oversight and strategy alignment
- HMC, AWH, PHCC**
Manage hospital & primary care appointments
- Private Hospital**
Provide slots & coordinate with public system
- IT**
Develop and maintain booking platform
- Referral Team & Clinic Staff**
Schedule & manage appointments
- Legal & Cybersecurity Unit**
Ensure compliance & data security
- Patients**
Book appointments, access care

Key Activities

Collect baseline referral-to-appointment data.
Assess backlog size & slot utilization rates. Audit private sector unused capacity.
Align MOPH, HMC, PHCC, and private sector stakeholders. Define governance structure.
Design technical architecture & API integrations for all pilot facilities.
Develop Maw'id Pediatric Booking App with real-time slot visibility across all facilities.
Conduct redistribution algorithm, cybersecurity, usability, & accessibility testing.
Prepare training materials for staff & patients.
Launch app allowing patients to self-book appointments across facilities.
Monitor waiting times, backlog, slot utilization, & patient experience. Adjust scheduling rules.
Analyze waiting times, no-shows, satisfaction, cost-effectiveness & impact.
Expand app functionality to additional specialties & municipalities.
Update policy, operational, & training guidelines. Launch public awareness campaign.
Integrate with national health systems.
