HOW MIGHT WE?

How might we motivate Qatari male high school students to pursue their education in STEM (Science, Technology, Engineering, Math) fields?

PROBLEM

There is a low proportion of male Qatari graduates in STEM fields.

STEM MEANS

We mean these careers.
All for one, one for all

Computer engineering
Biomedical engineering
Software engineering
Data analysis

USER PERSONA

Name: **Jassim**
Age: 17
Nationality: Qatari
Occupation: High school student

Background:
Jassim is a high school student who excels in technology and learned coding on his own.

Core needs:
A career aligned with his culture and values, good salary and prestige.

- Challenges:**
- Perception that a career in technology is not as valued as a profession in law or business management.
 - Lack of role models sharing the same background.
 - He often hears that pursuing a career in technology is “too hard”, “not for Qataris”, and “difficult to find a job in”.

IMPLEMENTATION PLAN

Step 1: Preparation (Months 1–3)

- Recruit team members (researcher, content creators).
- Get approval for interviews and school events.
- Design the platform (logo, colors, identity).
- Partner with schools and stakeholders.

Step 2: Create Content (Months 4–9)

- Interview 12 Qatari STEM leaders.
- Film 10 short reels with STEM students.
- Share weekly posts.
- STEM achievements, job openings, and events

Step 3: Launch (Months 10–12)

- Launch the Instagram platform and promote it.
- Host 1-day STEM events at 3 schools
- Inspirational talks from role models.
- Hands-on STEM workshops.
- Career advice sessions.

Step 4: Monitoring & Evaluation (12+ Months)

- Short-Term (2 Years)**
- Track metrics: follower growth, post engagement, and high school participation rates.
 - Survey students and parents to assess awareness and interest in STEM.
- Long-Term (Beyond 2 Years)**
- Evaluate enrolment rates in STEM-related careers.
 - Measure cultural acceptance and perception of STEM fields.
 - Establish ongoing partnerships for internships and scholarships.

3 public high schools for the implementation phase

Omar Bin Khattab
Secondary School

Ahmad Bin Mohammed Al-Thani
Independent School

Al Wakra Independent
Secondary School

EVIDENCES

EXISTING INITIATIVES

STAKEHOLDERS

COLLABORATORS

BENEFICIARIES

Young Qatari males
between 15-18 years.

INPUTS

Content creation:

- 1 market digital platform specialist.
- 1 content creators.
- 1 content designer Digital tools (video editing, photography, equipment)
- Funding for advertising in social media.

Ministry of Education and Higher Education

- 1 researcher with expertise in research, data collection, and networking.
- 1 or 2 members of the Department of Educational Guidance to connect with Qatari personalities (leaders and young graduates) involved in STEM fields in Qatar.

Collaboration

- Partnership agreement between stakeholders and collaborators.

High school engagement for the one day-event:

- Partnership agreement between the Ministry of Education and Higher Education and 3 selected schools.
- Logistic support for the event per school, including 1 team manager, 6 speakers, 5 young graduates in STEM fields, 100+ students, 3 workshops, and media coverage (official channels of stakeholders and new platform).

OUTPUTS

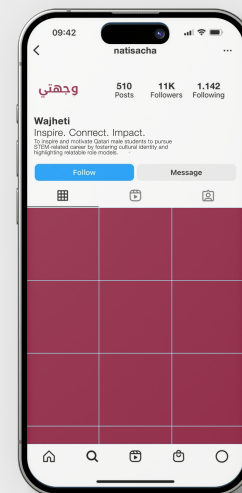

Social media platform

- Creation of a new social media platform on Instagram
- More than 8k followers.
- 150+ posts at least 5,000 views.
- At least 50 reels showcasing the personal stories, motivations, and impacts of Qatari leaders and youth in Qatar national development.
- At least 10 posts about internship opportunities.
- At least 30 posts about future projections and relevant data.
- At least 15 posts highlighting national recognitions and successful initiatives.
- +10 posts showcasing the experiences from the one-day event at the 3 selected high schools.

One-day event at each school:

- 1 formal agreement between the Ministry of Education and Higher Education, Qatar University and 3 selected high schools.
- 1 inspirational talk led by role models.
- 3 workshops conducted.
- 20% increase of awareness of attendance of high school students at workshops and internships.
- 100 students engage with role models and Qatari graduates in STEM fields at the orientation event.

From the **Ministry of Education and Higher Education Department of Educational Guidance.**

BUDGET

Budget		
Content development and strategy	QAR	15,000
Market digital platform specialists	QAR	15,000
Video Editor	QAR	12,000
Content designer Digital tools (video editing, photography, equipment)	QAR	12,000
Funding for advertising in social media and the promotion campaign	QAR	40,000
Researcher	QAR	15,000
Event coordinator	QAR	12,000
Events Manager	QAR	21,000
Total (annually)	QAR	1,264,000

OUTCOMES

Short term

- 15% increase in interest and perception of STEM fields among Qatari youth.
- 10% increase in the number of Qatari students enrolled in STEM-related careers.
- Increased parental awareness of STEM opportunities, with 30% of parents understanding the benefits of STEM careers for their children's futures.
- 15% increase in students participating in STEM-related activities, such as workshops, coding challenges, or STEM clubs.

Long term

- 20% increase in positive cultural perceptions of STEM fields for locals.
- 18% of Qataris entering in leadership roles in STEM sectors, such as AI, robotics, and data science.
- 15% growth in cultural acceptance for STEM careers among Qatari families.
- An upskilled generation of Qatari students aligned with the market demands.
- Long-term partnerships between schools, universities, and the private sector, boosting internships, scholarships, and employment opportunities for Qatari students in STEM fields.
